40+ YEARS

Workforce of
750+ Employees

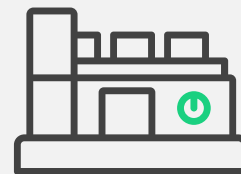

Serving in
90+ Countries

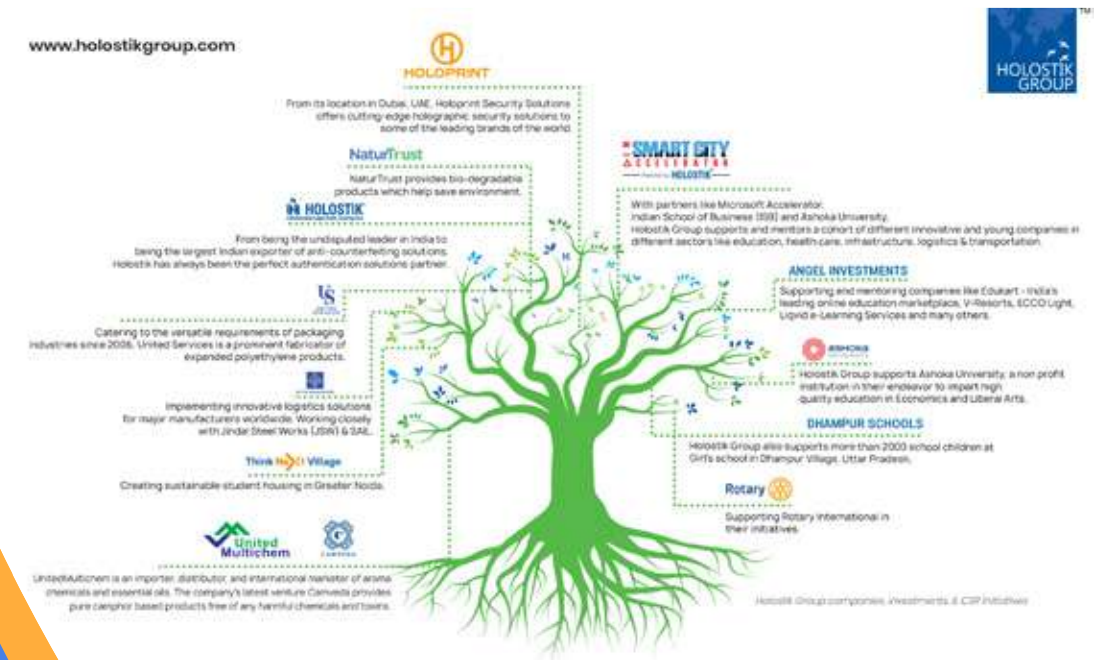

10,000+
Satisfied Clients

Centres in **12+**
Strategic Locations

10+ Advanced
Manufacturing Facilities

The plastic problem

To date, more than eighteen trillion pounds of plastic have been produced.

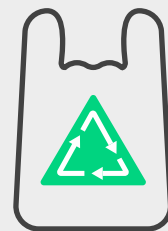

1000+ Years

Conventional plastic takes somewhere between 500-1000 years to break down completely.

How are we solving ?

Regional certifications, strong ethics, an intact supply chain, quick scaling ability, and research and development.

World-class, certified, biodegradable, compostable, cost-competitive, alternatives for industries such as retail, HORECA, fashion, health, and e-commerce.

Norms around the world

NaturTrust products have region-wise certifications across:

The United States and Canada

**BPI certification under
ASTM D 6400**

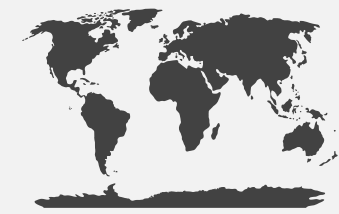

Europe

**DIN CERTCO certification
EN 13432**

Australia and New Zealand

**Australasian Bioplastics
Association(ABA)
certification and AS 4736**

Worldwide

**ISO 17088 and with
harmonised
ISO standards**

Raw material used

We create a circular economy

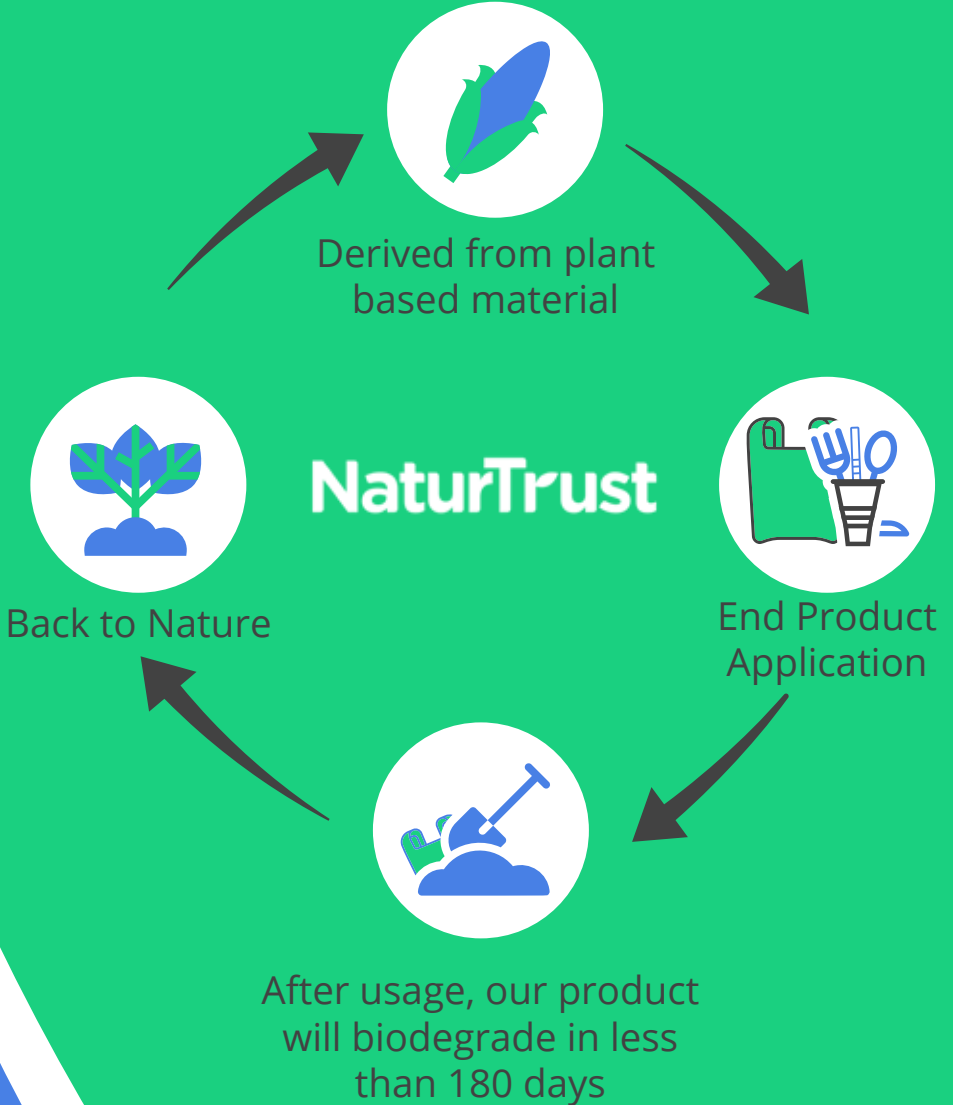

A linear economy manufactures products, uses them, and disposes them after usage.

In the circular economy, products are reused and composted which gives back the nutrients taken from the environment and does not fill toxic landfills.

Waste materials are also further utilized as the raw material for the next batch of products.
